

Ahoy there, pirate! 🏴‍☠️

Why don't you introduce and draw yourself first?
What do you look like? What pirate name do you
carry? Do you wear an eye patch? Do you have any
scars? Do you have all of your teeth?

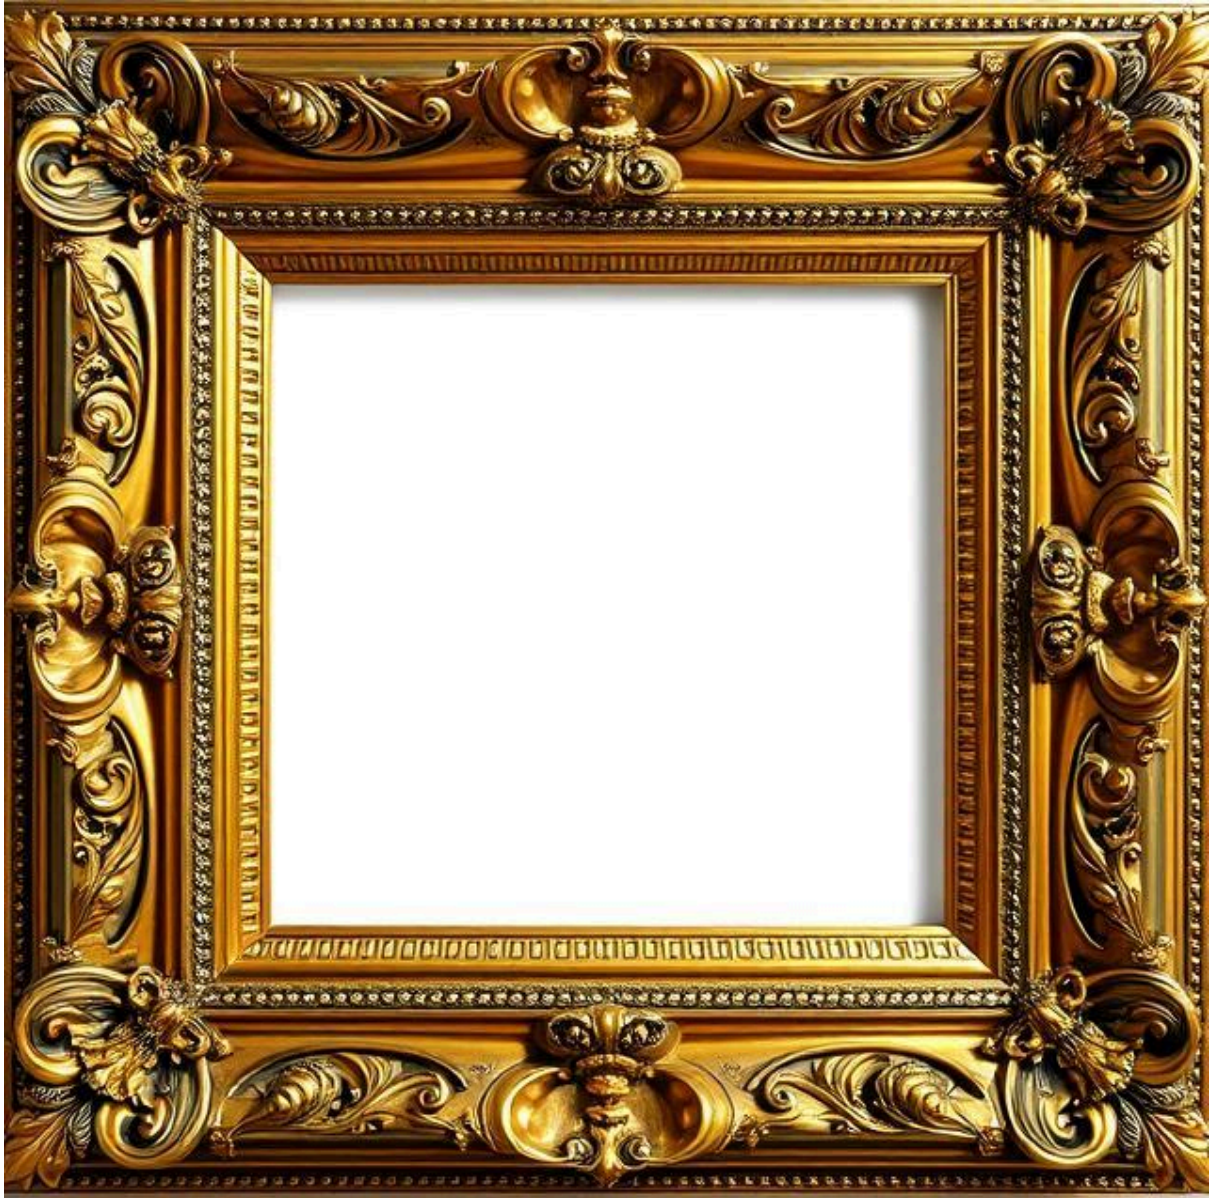

My pirate name is:

.....

Do you have a parrot on your shoulder? What is its
name?

You would not be a pirate without a ship. What does it look like? What is its name?

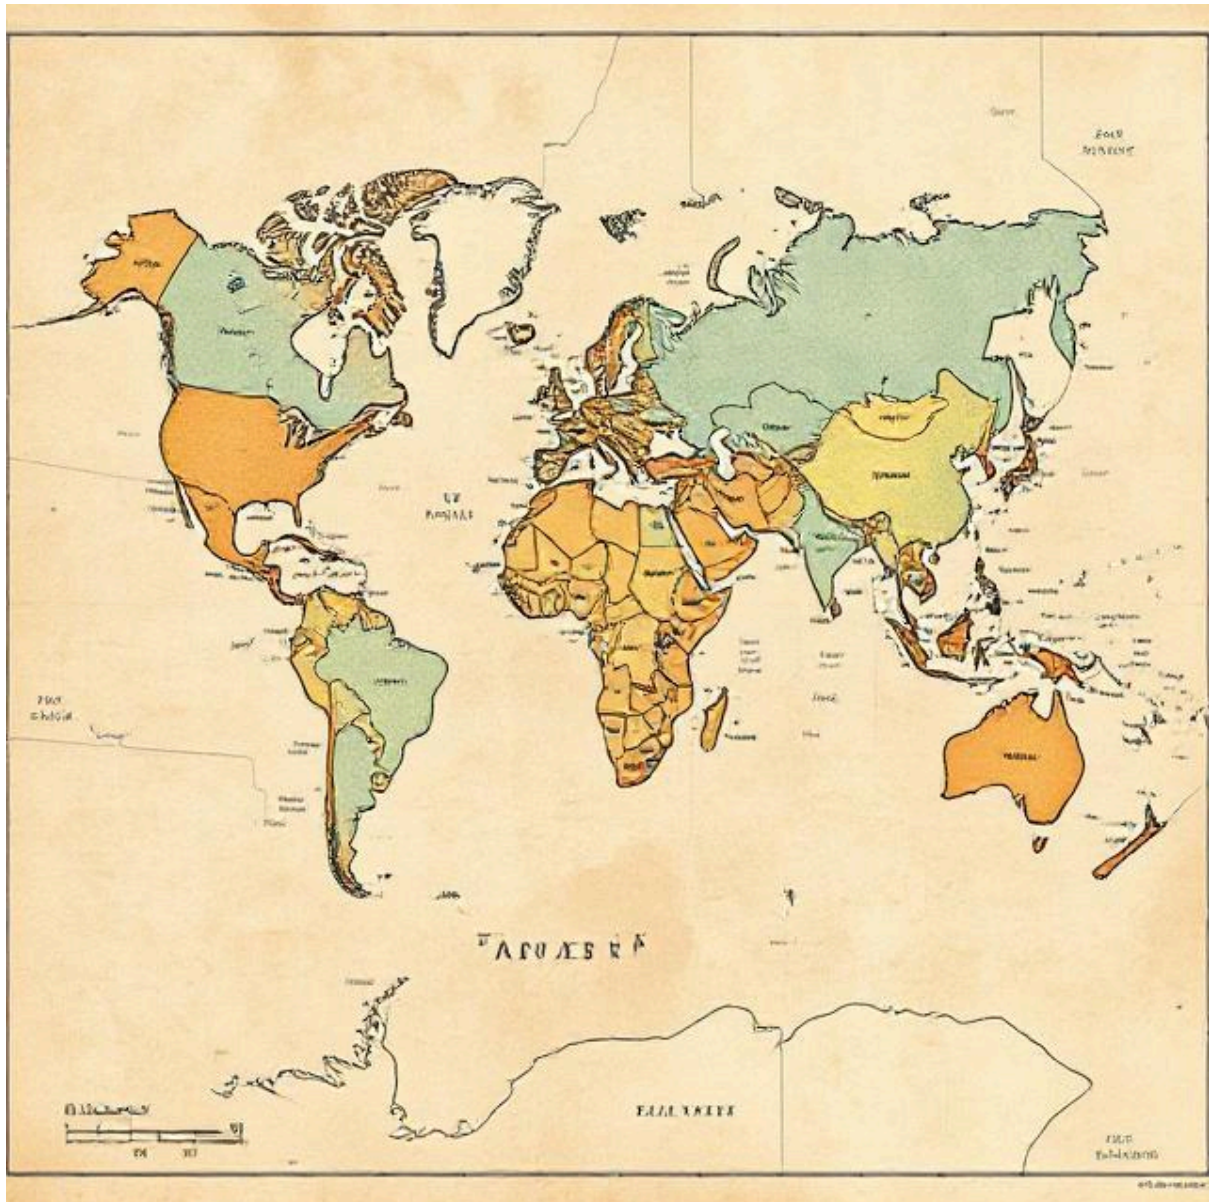

My ship's name is:

.....

I named it so because.....

Have a look at the olden map and plan your next voyage and draw the route. What oceans or seas are you going to sail? What continents are you going to visit?

The oceans and seas I am going to sail:

.....

The continents I am going to see:

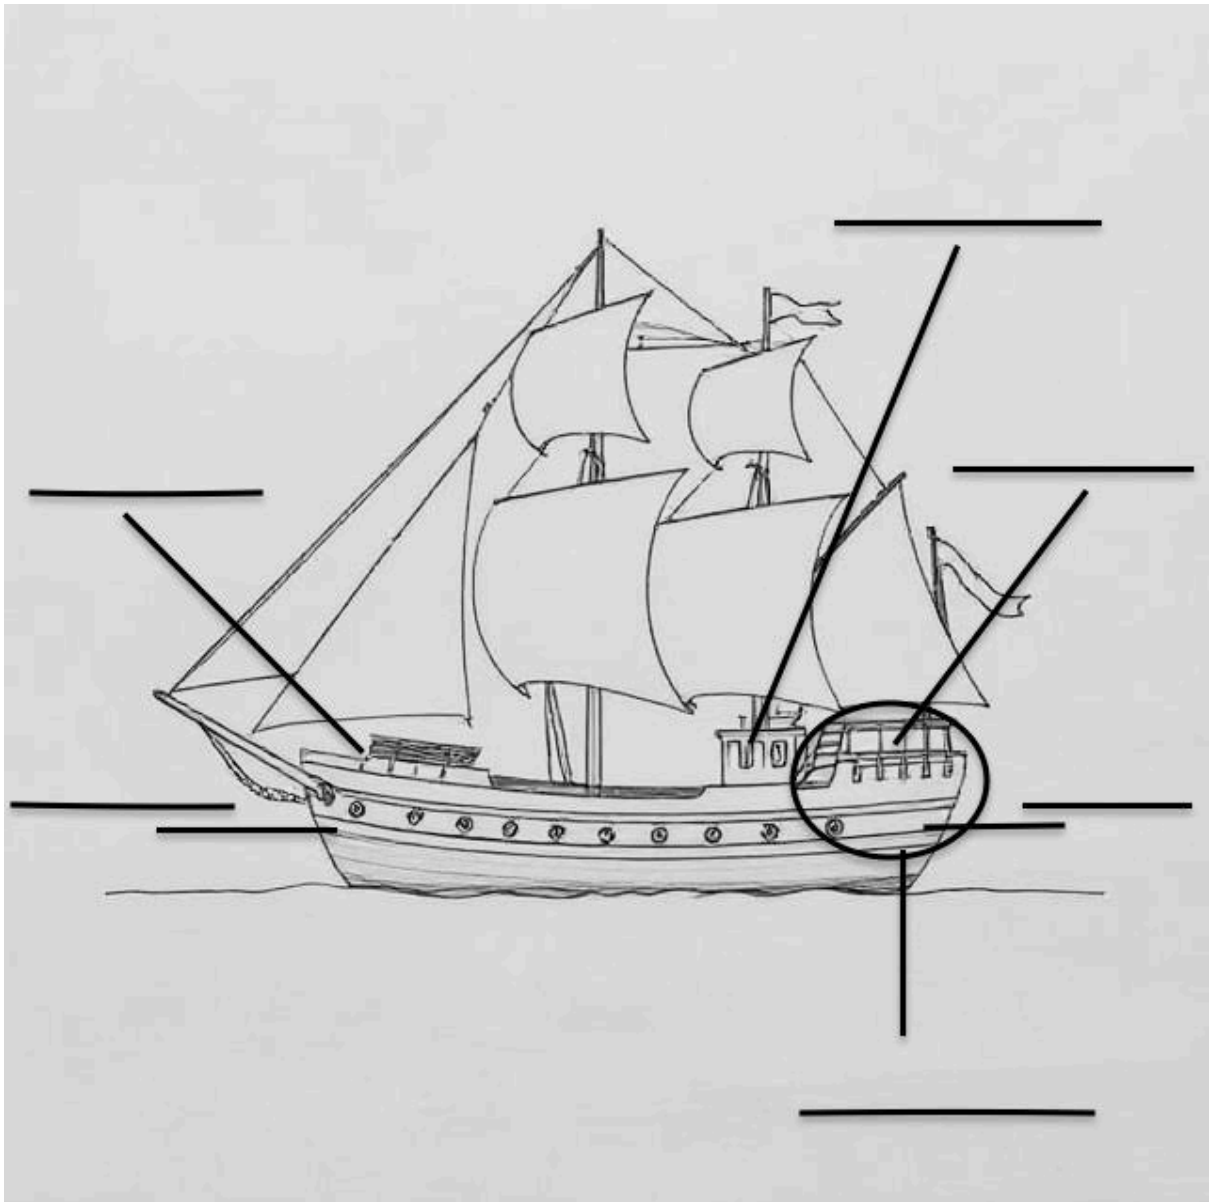

.....

Put an X where you think the treasure is hidden!

Your ship is full of people. Your crew. But remembering who does what can sometimes be a bit of a challenge. Match the names with the jobs.

Captain	a person responsible for the maintenance and cleanliness of the ship
Chief Cook	a person who cooks for the crew and is in charge of the galley
Deckhand	deck officer who makes important decisions on the navigation, communications, crew, cargo and overall running of the ship
Chief/First Mate	the person in command of a ship, you!
Navigation Officer	a person responsible for keeping the ship and machinery running
Chief Engineer	second in command to the Captain

Do you know castles are parts of the ship? Can you label the parts of the ship with the following: **bow**, **stern**, **fo'c'sle** or **forecastle**, **aftercastle**, **poop deck**, **bridge**.

What are portholes? In which part of the ship would you find the captain's rooms? What is a crow's nest on a ship? You may want to do some research.

To navigate the ship well, you need tools that will help you learn where you are and determine where you wish to go. From the words below choose the ones you could use while sailing. Remember you are navigating it, not trying to fix it!

a hammer

a chisel

a shovel

a compass

a tape measure

dividers

a screwdriver

an echo sounder

a radar

a sextant

a spanner

an axe

pliers

a wrench

GPS receiver

an anvil

knives

a signalling lamp

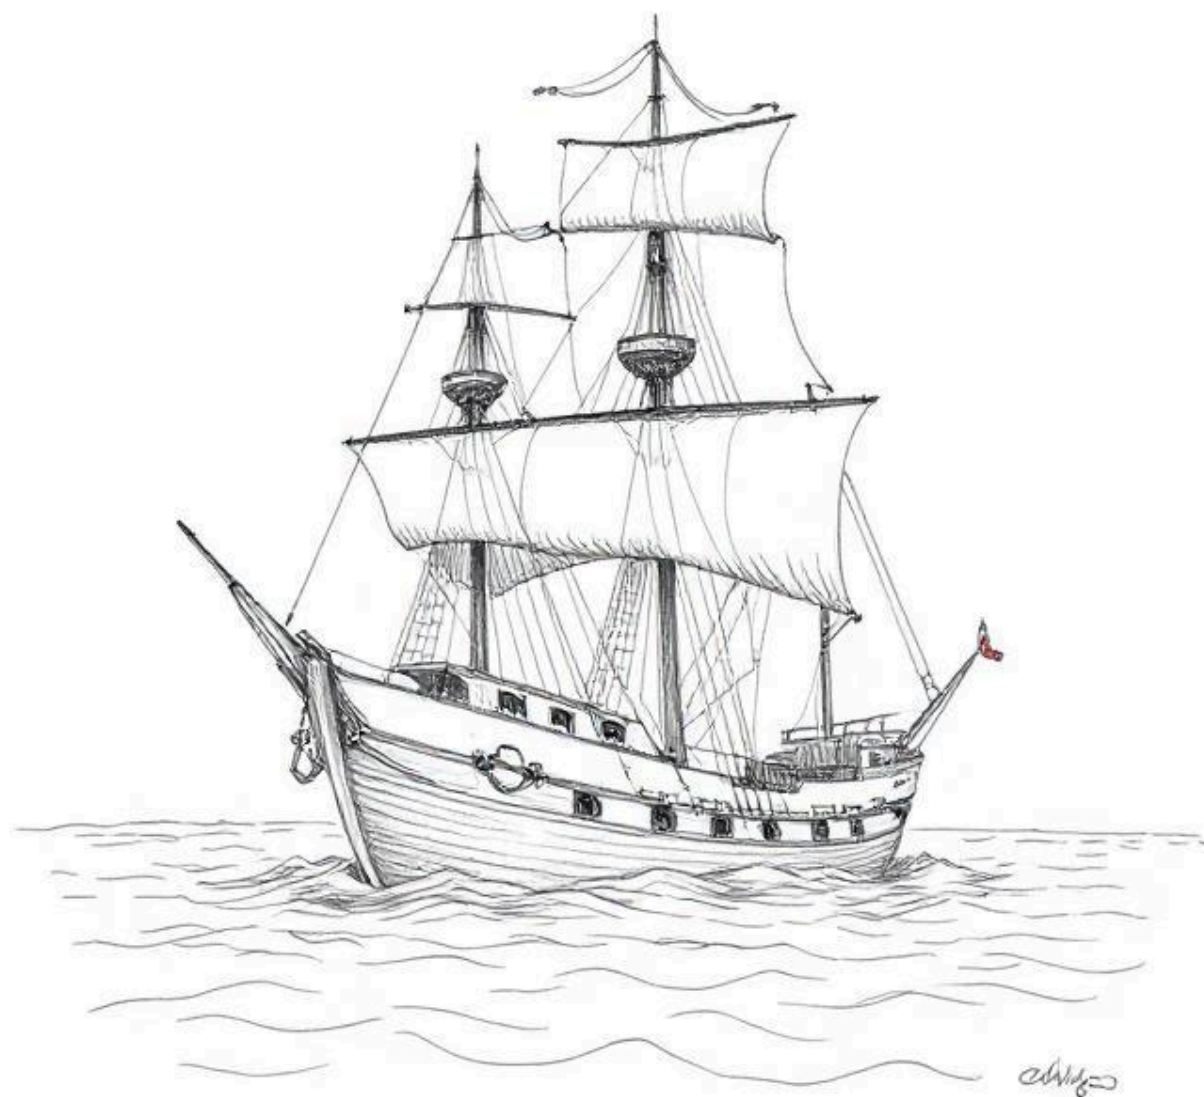

Both men and women were pirates in the past, of whom men constituted the majority. They were colourful characters, venturesome, hardy, and determined. The pictures below lack colour. Can you help pirates stand out?

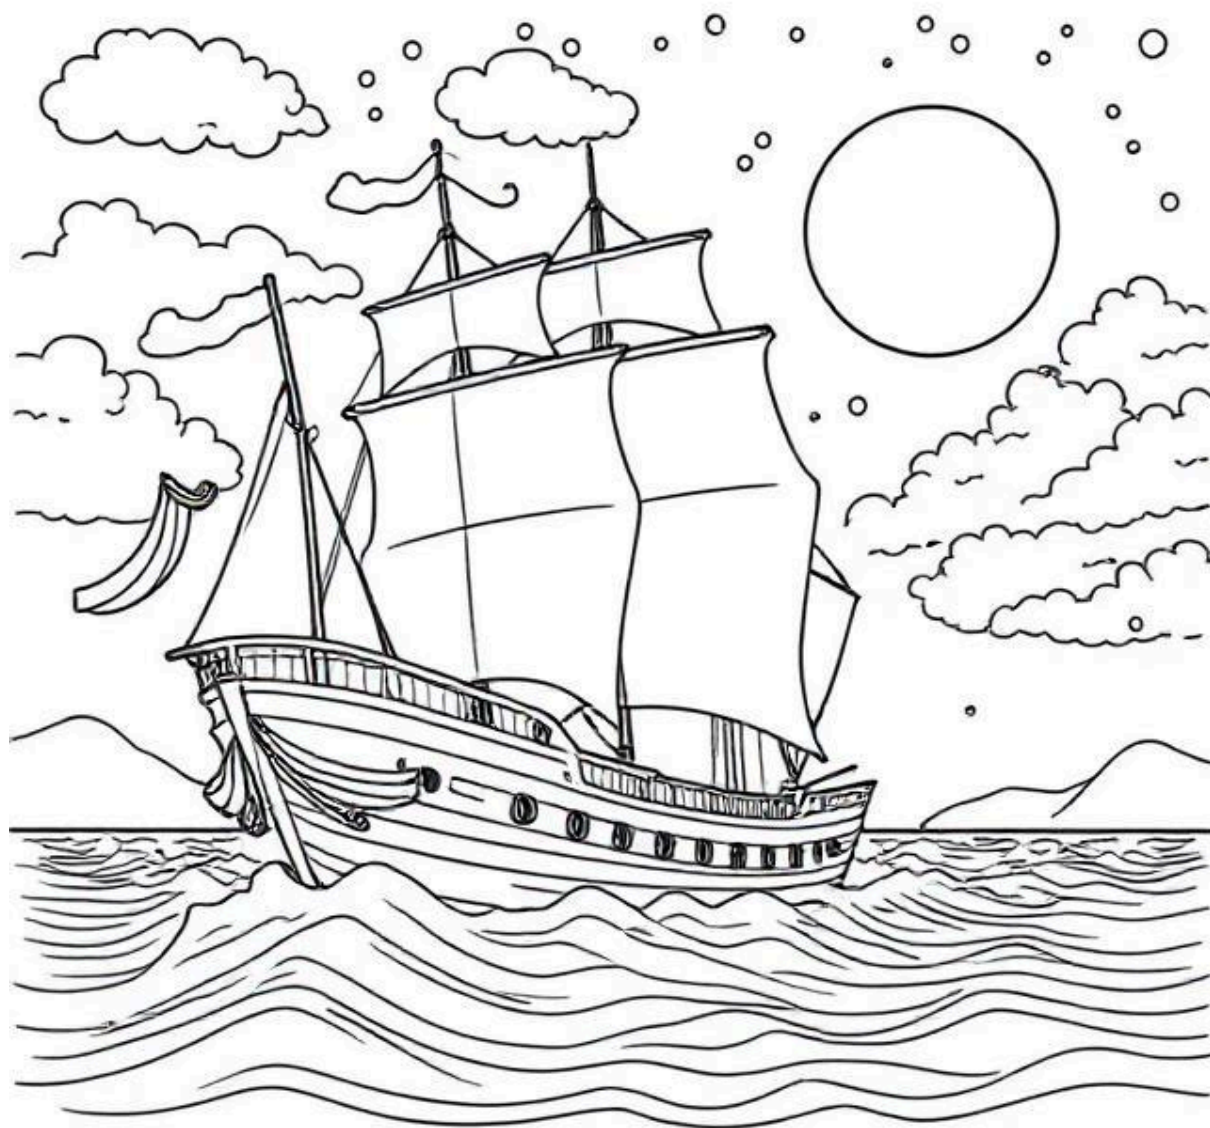

And now some ships!

All colouring pages were generated by AI.

Answers:

Captain is the person in command of a ship, you!

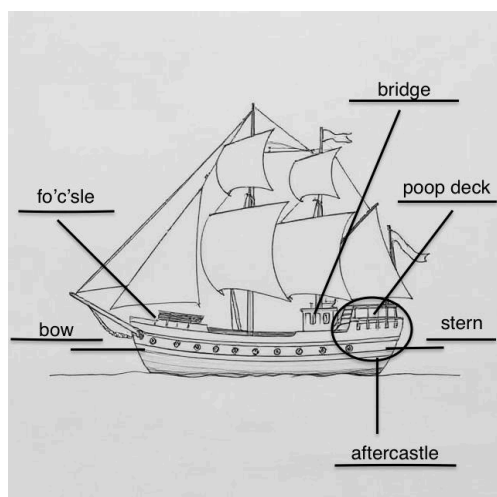

Chief Cook is the person who cooks for the crew and is in charge of the galley.

Deckhand is the person responsible for the maintenance and cleanliness of the ship.

Chief/First Mate is second in command to the Captain.

Navigation Officers are deck officers who make important decisions on the navigation, communications, crew, cargo and overall running of the ship.

Chief Engineer is the person responsible for keeping the ship and machinery running.

Things you need to navigate a ship:

a sextant, a compass, dividers, GPS receiver, an echo sounder, a radar, a signalling lamp
